Release Notes for SimplerQMS Patch 3.1.5

Improvements

ID	Summary	Details
SQ-665	Create Subchapter for Standard Chapters	<p>Users now have the capability to create nested standard structures through the introduction of Subchapters to Standard Chapters and definition of a Main Level on the Standards.</p> <p>This feature enables a more granular and organized approach to document management, facilitating easier overview and navigation within the system.</p> <p>A new set of views has been introduced and will be expanded upon in future releases. If there is any urgent need for new views for this feature, please reach out to support@simplerqms.com.</p>
SQ-679	IND structure introduced as Standards and Standard Chapters	<p>Introducing the IND (Investigational New Drug) structure within the system.</p> <p>Users can now tag documents using the Standard Chapter field, enhancing organization and accessibility within the IND framework.</p> <p>If this list is not relevant to the organization, the values can be disabled and made Not Current. This removes them from being selectable on the Standard Chapter field.</p>
SQ-680	eTMF structure introduced as Standards and Standard Chapters	<p>Introducing the eTMF (electronic Trial Master File) structure within the system.</p> <p>Users can now tag documents using the Standard Chapter field, enhancing organization and accessibility within the eTMF framework.</p> <p>If this list is not relevant to the organization, the values can be disabled and made Not Current. This removes them from being selectable on the Standard Chapter</p>

ID	Summary	Details
		"Shared License," indicating that multiple users can share access under this license type. "Named License" has been renamed as "Single User License," reflecting that it is a license for individual use.
SQ-675	Printed By user delegate on Controlled Print Tracking Items	To prevent recall notifications from being overlooked when an employee leaves, their delegate user will now be automatically added to the generated Print Tracking Items for which they were responsible.
SQ-628 SQ-651 SQ-659	Optimized performance by removing unused settings from the codebase	There are no changes to the user interface, these enhancements aim to make the system more reliable and robust and increase performance.
SQ-666	New Compliance Kit version	There are no changes to the user interface, these enhancements aim to make the system more reliable and robust and increase performance.
SQ-670	New Property Calculator Version	There are no changes to the user interface, these enhancements aim to make the system more reliable and robust and increase performance.

Bug Fixes

ID	Summary	Details
SQ-656	Periodic Document Review permission recalculation	The permission recalculation is limited to the New state. This change allows users to manually change the Responsible Person field on Periodic Document Reviews without the setting reverting to the original responsible person of the source document.
SQ-669	Block rollback of attachments to initial version	To prevent the regeneration of document numbers, the ability to roll back to the initial version of a document attachment has been blocked. This measure ensures that document numbers remain consistent and avoids potential confusion or duplication caused
